

Dental Philosophy & Services

OUR PHILOSOPHY

In continuation of Dr. Tucker's dental practice, I strive to carry on the excellence he has provided to his patients over the past 64 years. He made it a goal to provide the best quality dental care each and every day of practice, and I would like to do the same. With Dr. Tucker's mentorship, other local dentists' mentorship, continuing dental education and the fellowship of two dental study clubs, my desire is to provide the highest quality dentistry.

That being said, patient comfort is a top priority for us. This includes gentle touch, patient control, and complete explanations about procedures and treatment options. We understand that coming to the dentist isn't something you do everyday, and for many people there is some anxiety related to that. Our goal is to keep you relaxed and comfortable as much as possible.

I pride myself on making sure each patient is knowledgeable about their oral health and the options they have to restore their teeth and gums to health. I like to be completely honest when providing care for our patients so they can make well-informed decisions about their care and treatment plan..

Our over-arching goal is to ensure our patients are well taken care of and they remain happy and satisfied with their care. With our patient-centered approach each and every day, our practice has continued to receive confident referrals from our content patients.

We look forward to seeing you!
